Competitive Products vs. AZteroid

Common fungicide and fertilizer

AZteroid mixes uniformly with starter fertilizer for easy, single-pass application.

No Clogging

AZteroid and fertilizer

Common fungicide and fertilizer

Stress-Free

- Apply fertilizer and fungicide in a single pass
- Mix directly with all types of starter fertilizer; NO expensive equipment, NO additives
- No worries if weather (like rain or freezing) delays applications—product stays mixed in fertilizer for 24 hours with only mild agitation needed

At-plant application of AZteroid protects:

- Corn, soybean, sugar beets and a wide range of other crops against Rhizoctonia diseases including damping off, seedling blight, root rot, lower stalk & stem rots
- Cotton and peanut against Pythium diseases such as seedling blight and damping off
- Potato against black dot and silver scurf along with black scurf
- Soybeans and other crops against southern blight

Higher Yields. Increased Profits.

Corn yield response to starter fertilizer and AZteroid, in bushels per acre.
